Performance Analysis

Total Duration: 7,895ms (7.895 seconds)

Major Operations

Operation	Duration	% of Total	Status
TOP Service (Route Optimization)	5,987ms	76%	🔴 Bottleneck
GetPoolDto (TMS → Backend)	1,022ms	13%	✅ Normal
SetPoolDto (Backend → TMS)	815ms	10%	✅ Normal
Overhead (Processing)	71ms	1%	✅ Minimal

Key Findings

- **Bottleneck:** TOP Service optimization takes 5.987s (76% of total time)
- **TMS Bridge Performance:** Both GetXserverDto (960ms) and SetXserverDto (787ms) are within normal range
- **Backend Overhead:** Minimal processing overhead (71ms across all non-TMS/TOP operations)
- **Network Latency:** Very low (<30ms between service boundaries)
