

# Trace Logs: e86fb4e5-f246-4250-b53a-39b8ad8baada

**Timestamp:** 2026-03-10 18:44:59 (Local) / 2026-03-10 17:44:59 (UTC)

**Transport Order:** 10340432603203

**Duration:** 7.113 seconds

## Files

- complete-trace.json - Complete trace in structured JSON format (queryable)
- frontend-console-log.txt - Frontend browser console output
- backend-log-20260310.txt - Backend Serilog output (full day log)
- tms-bridge-log-20260310.txt - TMS Bridge Serilog output (full day log)

## Quick Search

To extract only this trace from the logs:

```
# Backend traces
grep "e86fb4e5-f246-4250-b53a-39b8ad8baada" backend-log-20260310.txt

# TMS Bridge traces
grep "e86fb4e5-f246-4250-b53a-39b8ad8baada" tms-bridge-log-20260310.txt
```

## Capture Points Summary

| Time         | Component | Capture Point | Label             | Step Duration | Cumulative Time |
|--------------|-----------|---------------|-------------------|---------------|-----------------|
| 17:44:59.794 | Frontend  | CP-FE-1       | Request initiated | 0ms           | 0ms             |
| 17:44:59.799 | Backend   | CP-BE-1       | Request received  | 5ms           | 5ms             |

| Time         | Component  | Capture Point    | Label                   | Step Duration  | Cumulative Time |
|--------------|------------|------------------|-------------------------|----------------|-----------------|
| 17:44:59.804 | Backend    | CP-BE-2          | Before GetPoolDto       | 5ms            | 10ms            |
| 17:44:59.808 | TMS Bridge | CP-TB-1          | GetXserverDto entry     | 4ms            | 14ms            |
| 17:45:00.334 | TMS Bridge | CP-TB-1-Complete | GetXserverDto completed | <b>526ms</b>   | 540ms           |
| 17:45:00.338 | Backend    | CP-BE-3          | PoolDTO received        | 4ms            | 544ms           |
| 17:45:00.338 | Backend    | CP-BE-4          | Before TOP Service      | 0ms            | 544ms           |
| 17:45:06.315 | Backend    | CP-BE-5          | After TOP Service       | <b>5,977ms</b> | 6,521ms         |
| 17:45:06.315 | Backend    | CP-BE-6          | Before SetPoolDto       | 0ms            | 6,521ms         |
| 17:45:06.324 | TMS Bridge | CP-TB-2          | SetXserverDto entry     | 9ms            | 6,530ms         |
| 17:45:06.901 | TMS Bridge | CP-TB-2-Complete | SetXserverDto completed | <b>577ms</b>   | 7,107ms         |
| 17:45:06.903 | Backend    | CP-BE-7          | After SetPoolDto        | 2ms            | 7,109ms         |
| 17:45:06.903 | Backend    | CP-BE-8          | Response sent           | 0ms            | 7,109ms         |
| 17:45:06.907 | Frontend   | CP-FE-2          | Response received       | 4ms            | <b>7,113ms</b>  |

## Performance Analysis

**Total Duration: 7,113ms (7.113 seconds)**

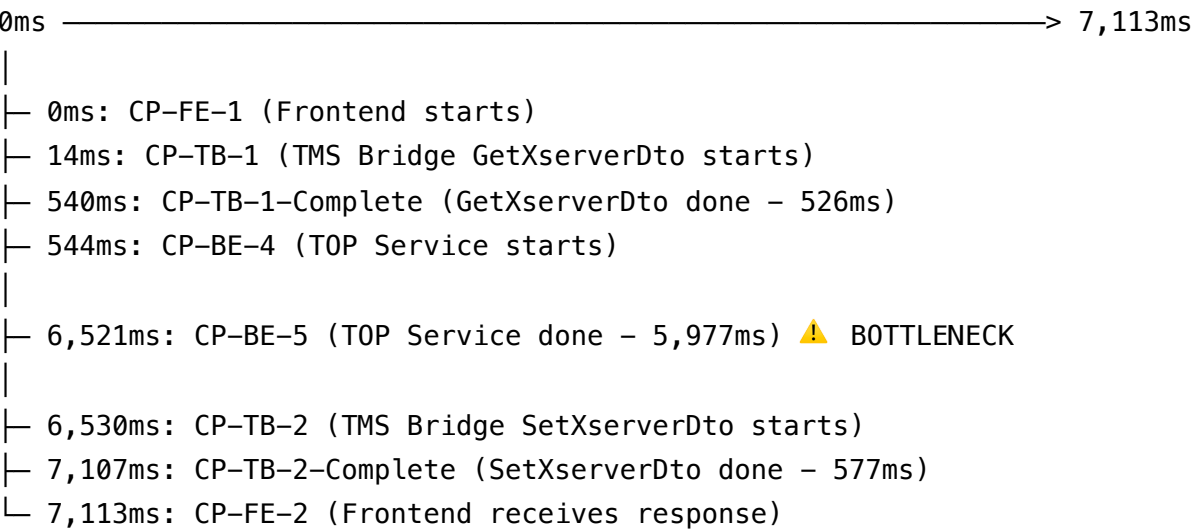

# Major Operations

| Operation                        | Duration | % of Total | Status                    |
|----------------------------------|----------|------------|---------------------------|
| TOP Service (Route Optimization) | 5,977ms  | 84%        | <span>🔴</span> Bottleneck |
| SetPoolDto (Backend → TMS)       | 588ms    | 8%         | <span>✅</span> Normal     |
| GetPoolDto (TMS → Backend)       | 534ms    | 8%         | <span>✅</span> Normal     |
| Overhead (Processing)            | 14ms     | 0%         | <span>✅</span> Minimal    |

# Key Findings

- **Bottleneck:** TOP Service optimization takes 5.977s (84% of total time)
- **TMS Bridge Performance:** Both GetXserverDto (526ms) and SetXserverDto (577ms) are within normal range
- **Backend Overhead:** Minimal processing overhead (14ms across all non-TMS/TOP operations)
- **Network Latency:** Very low (<10ms between service boundaries)

# Visual Timeline

# Comparison with Previous Trace

| Metric         | Previous (6837d454) | Current (e86fb4e5) | Change                             |
|----------------|---------------------|--------------------|------------------------------------|
| Total Duration | 7,895ms             | 7,113ms            | -782ms (10% faster) <span>✅</span> |

| Metric      | Previous (6837d454) | Current (e86fb4e5) | Change                                                                                                  |
|-------------|---------------------|--------------------|---------------------------------------------------------------------------------------------------------|
| GetPoolDto  | 1,022ms             | 534ms              | -488ms (48% faster)  |
| TOP Service | 5,987ms             | 5,977ms            | -10ms (similar)                                                                                         |
| SetPoolDto  | 815ms               | 588ms              | -227ms (28% faster)  |

**Analysis:** This trace is 10% faster overall, primarily due to improved TMS Bridge response times for both GetPoolDto and SetPoolDto operations. TOP Service performance remains consistent around 6 seconds.
