Recommendations

Immediate Action Required

1. Add TO_QPAYLOAD.sql to all_create_types.sql

- Insert `\i ../type/TO_QPAYLOAD.sql` at the appropriate location in `src/sql/scripts/type/all_create_types.sql`
- Recommended position: After line 101 (after DBTO_TMS_HST_VT.sql) since it follows alphabetical ordering

Verification Steps

1. Add the missing file to the release script
2. Run the release script in a test environment to ensure proper execution order

3. Verify no dependency errors occur
